IP camera tester

User Manual

(V01.00)

- Thank you for purchasing the IP camera tester. Please read the manual before using the IP camera tester and use properly.
- For using the IP camera tester safely, please first read the [Safety Information] carefully in the manual.
- The manual should be kept well in case of reference.
- Keep the S/N label for after-sale service within warranty period. Product without S/N label will be charged for repair service.
- If there is any question or problem while using the IP camera tester, or damages occurred on the product, please contact our technical Department.

1.Safety information

- The tester is intended to use in compliance with the local rules of the electrical usage and avoid to apply at the places which are inapplicable for the use of electrics such as hospital, gas station etc.
- ◆To prevent the functional decline or failure, the product should not be sprinkled or damped.
- The exposed part of the tester should not be touched by the dust and liquid.
- During transportation and use, it is highly recommended to avoid the violent collision and vibration of the tester, lest damaging components and causing failure.
- Don't leave the tester alone while charging and recharging. If the battery is found severely hot, the tester should be powered off from the electric source at once. The tester should not be charged over 8 hours.
- Don't use the tester where the humidity is high. Once the tester is damp, power off immediately and move away other connected cables.
- The tester should not be used in the environment with the flammable gas.
- ◆ Do not disassemble the instrument since no component inside can be repaired by the user. If the disassembly is necessary indeed, please contact with the technician of our company.
- ◆ The instrument should not be used under the environment with strong electromagnetic interference.
- Don't touch the tester with wet hands or waterish things.
- Don't use the detergent to clean and the dry cloth is suggested to use. If the dirt is not easy to remove, the soft cloth with water or neutral detergent can be used. But the cloth should be tweaked sufficiently.

2. IP Camera Tester Introduction

2.1 General

The 7 inch touch screen IP camera monitor is designed for maintenance and installation of IP cameras, analog cameras, TVI, CVI, AHD cameras, as well as testing 4K H.264 /4K H.265 camera by mainstream, The 1920x1200 resolution enables it to display network HD cameras and analog cameras in high resolution. The unit supports many ONVIF PTZ and analog PTZ control. The combination of touch screen and key buttons make the IP camera tester very user- friendly.

The tester is also a great tool for Ethernet network testing. It can test PoE power voltage, PING, and IP address searching. You can use the blue cable tracer to locate individual connected cables from a bundle of cables. Test LAN cable for proper connection termination. Other functions include providing 24W PoE power to your camera, HDMI IN and out, CVBS loop test, testing IP and analog at the same time, LED Flashlight, DC 12V 2A power output and much more. Its portability, user-friendly design and many other functions make the IP tester an essential tool for all installers or technicians.

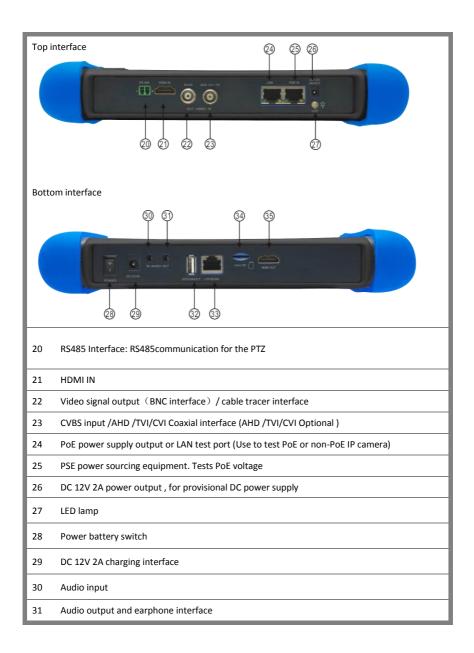

2.2 Packing list

- 1). Tester
- 2). Adaptor DC12V 2A
- 3). Network cable tester
- 4). Polymer lithium ion battery (7.4V DC 5000mAh)
- 5). BNC cable
- 6). RS485 cable
- 7). Output Power cable
- 8). Audio cable
- 9). Safety cord
- 10). Tool bag
- 11). Manual
- 12).8GB SD card

2.3 Function interface

_		
1	<u>(U)</u>	Press more than 2 seconds, turn on or off the device, short press to turn on or off
		the menu display
2	MENU	Menu key. press it to call shortcut- menu

8	OPEN	Open/set, Confirm the setting of parameters, open or enlarge the aperture
9	CLOSE	
10		Upward, set function or add parameter. Tilt the PTZ upward
	\bigcirc	Rightward, select the parameter whose value will be changed. Add the value of
11		the parameter. Pan the PTZ right
12		Leftward, select the parameter whose value will be changed
		Downward, set function or reduce the value of the parameter. Tilt the PTZ
13		downward
14	ENTER	Confirm key (Long press it to capture screen interface)
15	RETURN	Return/Close: Return or close
		The charge indicator: it lights red while the battery is being charged. As the
16		charging is complete, the indicator turns off automatically
4-		The RS485 data transmission indicator: it lights red while the data is being
17		transmitted
18		The data received indicator: it lights red while the data is being received
19		The power indicator: it lights green while the tester is powered on by the adapter
_		

- 32 USB 5V 2A power output (used only for power, not data)
- 33 UTP cable port: UTP cable tester port/ Cable tracer port
- 34 Micro SD card moveable (comes with 8GB, supports up to 32GB)
- 35 HDMI output interface

3. Operation

3.1 Installing the Battery

The battery main switch at the right-bottom corner of tester bottom.

- "0": Battery power off
- "1": Battery power on

The tester has built-in lithium ion polymer rechargeable battery, the tester's bottom power should turn to "0" for safety during transportation (the factory default is "0"). Using the instrument, please switch power button to "1", press the v several seconds can turn on/off tester. In general, user no need to turn on battery switch. If don't use the instrument in long time, please turn off the switch.

Notice: Please use the original adaptor and connected cable of the device!

When the battery icon is full or the charge indicator turns off automatically, indicate the battery charging is completed

Notice: When the Charge Indicator 🖃 turns off, the battery is approximately 90%

charged. The charging time can be extended for about 1 hour and the charging time within 12 hours will not damage the battery.

Notice: Press the key 💿 several seconds to restore the default settings when the

instrument works abnormally.

Multi-meter: The red and black multi-meter pen must insert the corresponding port.

Warnings: Instrument communication port is not permitted access circuit voltage over 6V,

otherwise damage the tester.

Marnings: Not allow insert multi-meter pen in the

current terminal to measure voltage.

3.2 Instrument connection

3.2.1 IP camera connection

Power an IP camera with an independent power supply, then connect the IP camera to the IPC tester's LAN port, if the link indicator of the tester's LAN port is green and the data indicator flickers, it means the IP camera and the IPC tester are communicating. If the two indicators don't flicker, check if the IP camera is powered on or the network cable is not functioning properly.

Note:1) If the IP camera requires PoE power, then connect the IP camera to the IP tester's LAN port . The tester will supply PoE Power for the IP camera. Click on the icon labeled POE to turn the PoE Power off or on.

2) If use the tester's menu to turn off the tester's PoE power supply, the PoE switch and the power

sourcing equipment are allowed to connect to the tester's PSE port, and the PoE power will be supplied to the IP camera by the tester's LAN port. On this condition, the tester cannot receive data from IP camera, but the computer connected to the PoE switch can receive the data via the the tester.

Warning: PoE switch or PSE power sourcing equipment only can be connected to tester "PSE IN" port, otherwise will damage the tester.

3.2.2 Analog camera connection

(1)) Connect the camera's video output to the IP tester's VIDEO IN. The image will display on the tester after pushing the PTZ icon.

(2) CCTV IP Tester "VIDEO OUT" interface connect to the Video input of monitor and optical video transmitter and receiver, the image display on the tester and monitor.

(3) Connect the camera or the speed dome RS485 controller cable to the tester RS485 interface (Note: positive and negative connection of the cable).

3.2.3 HD Coaxial camera connection

TVI, CVI, AHD camera are classified as HD coaxial cameras. Hereby the following instruction of how to connect AHD camera to the tester is also applied to TVI, and CVI camera.

 (1) Connect the AHD camera's video output to the IP tester's "AHD IN" interface, the image will display on the tester. The tester only come with AHD input interface. There is no AHD output interface.
 (2) Connect the AHD camera or the speed dome RS485 controller cable to the tester RS485 interface (Note: positive and negative connection of the cable).

3.2.4 HDMI IN

DVR or other device's HDMI out port connect to tester's HDMI in port, the meter will display input image.

3.3 OSD menu

Press the key 0 2 seconds to turn on. Press the key 0 again to turn off . short press the key 0 to enter sleep mode, press it again to test. If tester works abnormally and cannot be turned off , Press the key 0 several seconds to turn off, the tester reset.

3.3.1 Lite mode & Normal mode

Lite mode: You can easily find corresponding apps.

In Lite mode, press the icon several seconds, you can move the icon to other apps.

In lite mode, click the finger icon in the lower right corner to release lock icon, move icons and change function icons sequence.

Normal mode

Tap the screen and slide left or right to change menu.

In normal mode, press icon several seconds, go screen management status. Change icons sequence and move it to common tools bar.

You can move the icon to any pages, self-define the number of icons in any page. Make interface simple and individualized.

Create New Folder: Drag the icon to the folder in top right corner, enter the folder name, icon will be auto placed in the new named folder.

Press the folder several seconds, to change the folder name, you can move the icon out of folder, the

folder will be auto deleted until move out all icons.

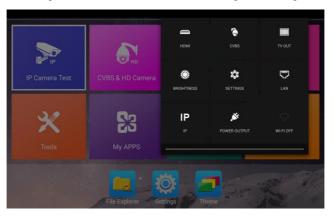

Select Icons to enter, if quit, please click 🔀

Click SD card, install or remove SD card.

3.3.2 Drop-down Menu

Press and slide at right top right corner twice to open shortcut menu. The shortcut menu includes POE power output, IP settings, Wi-Fi, HDMI IN, CVBS, Video OUT, LAN, Brightness, settings etc.

HDMI: Click HDMI IN to enter, in HDMI IN mode, it can convert test from analog to digital with dual test window IP & HDMI IN or Analog & HDMI in.

CVBS: Click icon "CVBS" to enter, you can test IP and analog camera at the same time .

Video OUT: Click "Video OUT" to enter floating window, connecting the BNC cable to tester and appears analog video monitor interface, it can test circuit and BNC cable whether normal.

LAN: Display network port or WIFI connection real-time upload and download speeds and other network parameters.

Brightness: Set brightness .

Settings: Enter settings interface.

IP: Enter IP Settings interface.

POE power output: Turn on or off the tester "PoE power" app.

WLAN: Turn on WLAN net and displays current WLAN status.

3.3.3 Short cut-menu

Multifunction Tester

You can call shortcut menu by press tester's "menu" key, you can self-define shortcut menu.

Press the key" (MENU)", you can turn on it, and switch functions, then press @ to enter app, tap other area on the screen, to exit the menu.

Short cut-menu setting, you can long press any app in the all applications list, it will auto move to shortcut menu. If delete any app in the shortcut menu, please select a app and press several seconds, it will be deleted.

3.3.4 Screen capture

Long press the key "enter", can capture screen interface and save it in any time.

You can go file management to view "File management - SDcard - Pictures - Screenshots".

3.3.5 TesterPlay

Mobile screen projection (Only for android version)

The meter creates WIFI hotspot, connect mobile phone to the tester's WIFI hotspot, or the tester and mobile phone connect to the same Wi-fi network. Tap icon " , then select "TesterPlay" app to enter, click "Start" button to generates two-dimensional code, Please use mobile phone scan it, then download and install the client software, you can view the screen real-time projection.

PC screen projection:

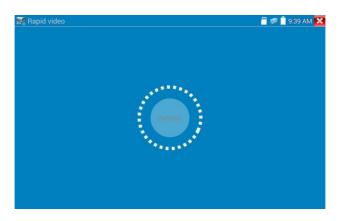

Install VLC player in the PC, turn on the VLC player "Media - Open Network Streaming", and input the RTSP address of on the top instrument two-dimensional code, click "play" to view the screen real-time projection. (you also can install "VLC player" in the mobile phone, tester and mobile phone display at the same time)

3.3.6 Rapid video

Press 📷

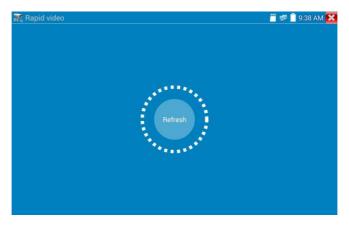

enter function, one key to detect all network cameras and auto play the images.

Auto log in and display camera image. Detailed operation refers to ONVIF function.

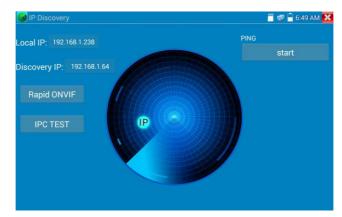

After exit ONVIF app, Click Refresh to search IP address.

3.3.7 IP discovery

Press IP discovery , tester auto-scan the whole network segment IP, as well as

auto-modify the tester's IP to the same network segment with the scanned camera's IP.

Local IP: Tester's IP address, Tester can auto-modify the tester's IP to the same network segment with the scanned camera's IP.

Discovery IP: Connected tester equipment's IP address. If the camera connected to the tester directly, tester will display the camera's IP address, if tester connects to Local Area Network, it displays the

current IP address.

Temp IP: After searching IP address, the modified tester's IP address will not be saved, if you do not select "Temp IP", the tester's IP address will auto-save after searching.

Start: PING function, Click "Start", can PING camera's IP.

Rapid ONVIF: Rapid ONVIF Quick link.

IPC TEST: IPC TEST Quick link.

Applicability: Using IP discovery app, you don't need to know the first two digits of camera's IP address, it can auto-scan the whole network segment IP, and auto-modify tester's IP address, greatly improved engineering efficiency.

3.3.8 Rapid ONVIF test

Rapid ONVIF can display 4K H.265/H.264 camera image by tester mainstream, one key to activate LTS camera.

Press onter ONVIF function, the meter auto scans all ONVIF cameras in different network

segments. It lists cameras name and IP address on the Left of screen. Tester can auto login camera and display camera image. Factory default use admin password to auto login, if you modified the password,

then default use the modified password to log in.

If you select ONVIF Rapid mode, the meter automatically scans different network segments for ONVIF cameras. It lists the camera name and IP address on the Device List. Tester can auto login camera and display camera image.

When the image is enlarged tap left, right, up or down on the image to move the whole image on the X ONVIF Main Stream 2560x1440 h264 🗂 🚅 🗍 10:20 AM 🔀 screen. d : admin Login Out Device List(1) Identification Time Set Maintenance 192.168.1.64 Network Set User Set Web nage NVT Live video nultiple:x1.19 Video Set Imaning Set ofiles Add Refresh setting menu 0

When the image is enlarged, it can also be operated by keyboard.

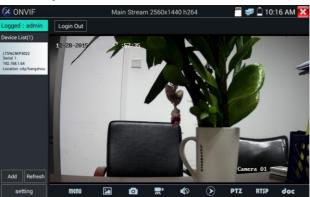

press the key (TELE+) to zoon in , press the key (WDE-) to zoom out , press upward and downward key to move image.

If it is network video input to the tester, as the tester supports resolution up to 1080p, the input image will be very clear after it is enlarged. This is greatly helpful for the installers to ensure the IP camera's video coverage and decide the IP camera's install site.

Image can only be enlarged on SD mode (The icon "ONVIF" is SD mode.)

Select relative function on the bottom Toolbar to operate, "Snapshot", "Record", "Photos",

"Video playback", "Storage set", "PTZ control" etc.

Snapshot: Click bottom "snapshot" to screenshot the image and store it to SD card.

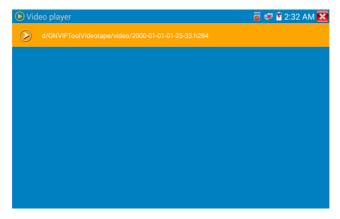

if select manual storage, appears dialog box "Input Name", user-defined the files name(by Chinese character, English letter or digit) to save in SD card, if select "Auto- storage", the tester auto stores the files after snapshot.

Record: When you click bottom the "Record" icon, video starts recording. A red recording icon appears on the screen and begins to flash and a timer appears indicating the time elapsed for the video. Click on the "Stop" icon to stop recording and save the video file to the SD card.

Playback: Click the "Playback" icon to view saved videos. Double click the video you want to play. Click

to return to the last menu.

To rename or delete a photo, click and hold on the file until this screen appears:

Video files can play in the Video player on the main menu.

PTZ

Set preset position: Move the camera to preset position, enter the preset number on the Bottom right corner to complete position preset.

Call the preset position: Select the preset number on the left, click "Call" to call preset.

PTZ Speed set: Horizontal and Vertical Speed set.

3.3.9 IP camera test

Display image from the 4K H.265 camera by main stream

Click icon

to enter IP camera test

Note: Currently, the IPC Test App only supports some brands' specific IP cameras, these include specific models made by LTS, ACTI, AXIS, Dahua, Samsung, and many more. If the camera is not fully integrated, please use the ONVIF or RTSP apps.

IPC test interface

Local IP: This is the tester's IP address. Click "Edit" to enter "IP setting" and change the tester's IP address settings.

IP camera type: Click on the IP Camera type to select the Manufacturer and model number of the integrated IP camera.

"Manual": If they are not in the same segment,, Honeywell, Kodak, Tiandy, Aipu-waton, ACTi, WoshiDA IP camera etc. If the brand has offered official original protocols, please select camera type, input IP camera address, user name and password, click "official" to enter the camera image display interface.

Stream code: When test camera via RTSP, you can select mainstream or sub stream to test (if camera's RTSP have not been start or without, it will tip "auto match" fail, please witch to manually selecting.

Judeo monitor tes	ter			a	💈 6:50 AM 🔀
Local IF					
IP camera type					
IPC Cameras I	i Please select stream :				
IPC User Nam-	Major stream(H265)				
	Minor stream1(352x288H264)	nor stream1(352x288H264)			
IPC Passwor	Cancel				
IPC Por					
Enter					

IP Camera's IP: Enter the IP camera's IP address manually or click "Search" to auto-scan for the IP camera's IP address. It is better to directly connect the IP camera to the tester so the search results will only display the camera's IP address. If the tester is connected to a

PoE switch, it will find and display several IP address.

IPC User Name: Enter IP camera's user name.

IPC Password: Enter IP camera's login password.

IPC Port: When you select the IP camera type, it will default the camera's port number and doesn't need to be changed.

After all settings are completed, click "Enter" to view the live video.

If IP address setting has error or IP camera is not connected. The tester prompts "Network Error".

Click X to quit from image display and return to IP camera test interface.

Once you are viewing video on the IPC Test app, you will see the "Video Menu" icon on the top right. This button will give you access to Snapshot, Record, Photo, Playback, PTZ, and Set. Please refer to the ONVIF section to use these functions.

3.3.10 HDMI IN

HDMI in HD signal test, Tap icon " 🦲 " to enter.

When tester receives HDMI in image, the top tool bar shows the resolution of this image. You can

select "resolution " to set resolution in the setting menu. Tap screen by twice, full image display. It supports resolution as follows

720×480p /720×576p /1280×720p /1920×1080p /1024×768p/1280×1024p /1280×900p /1440×900p

(1) Snapshot

Click the icon "Snapshot", when the video in, to take a picture and save the current video frame in the SD card as JPEG file.

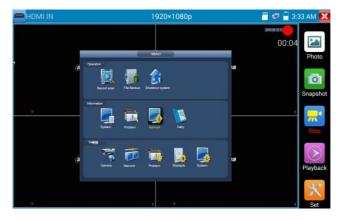

If the unit is set to the manual mode an "Input Name" pop up box will appear and you can enter a title for the snapshot. If the unit is set up to automatically set file names, this box will not pop up.

(2) Video record

When you click the "Record" icon, video starts recording. A red recording icon appears on the screen and begins to flash and a timer appears indicating the time elapsed for the video. Click on the "Record" icon again to stop recording and save the video file to the SD card.

If select manual storage, before recording begins, appears dialog box "Input Name", user-defined the files name(by Chinese character, English letter or digit) to store in SD card, tester will hereby store the files in SD card after recording. If select Auto-storage, tester will auto store the files in SD card after recording.

(3)Photo

Click the icon "photo" to enter, click the selected thumbnail photo to display it on the screen.

Double-tap the image can view full screen. Double-click again the photo to return.

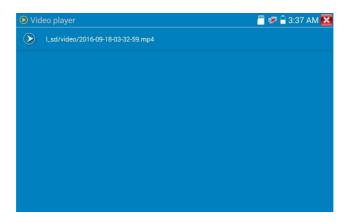

To rename or delete an image, click and hold on the file until this screen below appears

Click to close and return to PTZ controller.

(4) Recorded video playback

Click the "Playback" icon to view your recorded videos. Tap on the video file image you want to watch.

To rename or delete a video, click and hold on the file until this screen appears:

Video files also can play in the main menu "Video Player".

3.3.11 Video monitor test

Analog camera test and PTZ control, click ico

Display the input video image, click the top menu bar icon

to enter video level meter

(PEAK level, SYNC level, COLOR BURST measurement)

Select relative function on the right side Toolbar to operate , functions including "Photos", "Snapshot",

"Record", "Playback", "PTZ", "Set",

Click 🐹 , or press MENU to quit.

Click the screen twice quickly, can be full zoom in on the touch screen.

(1) PTZ controller parameter setting

Select and click icon "PTZ" to enter PTZ setting:

🎘 Analog		UBI BERT		PA	L 🗃 🐖 🛛	🗋 10:11 AM 🔀
11 11	205/	1	11	1		
12-6	Protocols:		Pelco D			
	Port:		RS485			
11	Baud Rate:		2400			
	Address:	\triangleleft			2	
	Tilt speed:		40		9	
	Tilt speed:		40			
COLUMN STREET	Set Position:					Playback
	Call Position:					
	ОК		Canc	el		

A. Protocol

Use the up and down arrow keys to move the yellow cursor to the "protocol", set corresponding Protocol and support more than thirty PTZ protocols. Such as Pelco-D, Samsung, Yaan, LiLin, CSR600, Panasonic, Sony-EVI etc.

B. Port

Click and move, to "port" Select the communication port for the PTZ camera controlling (RS485)

C. Baud

Move the yellow cursor to "Baud", Select the baud rate according to baud rate of the PTZ camera.(150/300/600/1200/2400/4800/9600/19200/57600/115200)

D. Address

Set the ID according the ID of PTZ camera (0~254), the setting address data must be consistent the speed dome address.

- E. Pan speed: Set the pan speed of PTZ camera (0~63).
- F. Tilt speed: Set the tilt speed of PTZ camera (0~63).

G. Set preset position (Set PS)

Click and select "Set PS", set and save preset position number(1~128).

H. Call the preset position (Go ps)

Click and select "Set PS", set and save preset position number (1~128), click "sure" to save, Call some special preset number, can call the dome camera menu.

A

Check and set the protocols, address, interface and baud, all must be consistent with the dome camera, then the IPC tester can test .After setting the parameter, the tester can control the PTZ and lens.

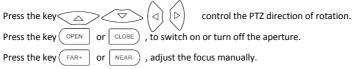

To control PTZ by screen touch:

Tap left, right, upward and downward on the touch screen to control the PTZ rotation direction. By two fingers move outward and inward on the touch screen to zoom in and out the PTZ.

PTZ Control:

Press the key $\textcircled{\mathsf{TELE}}$ or $\fbox{\mathsf{WIDE}}$, manually adjust the zoom

(2) Video and storage setting

Click icon "set" to enter and set analog video image brightness, contrast, color saturation, as well as the file storage way after snapshot and recording, support auto-storage and manual storage. When select manual storage, user can name and store the files.

(3) 4 x zoom image display and Video out

When image input, press () to enter "zoom", press it again to quit.

Using the touch screen to control PTZ camera movement:

Tap left, right, upward or downward on the video image to move the PTZ camera in a desired direction. Stretch two fingers outward or inward on the touch screen to zoom the image in or out.

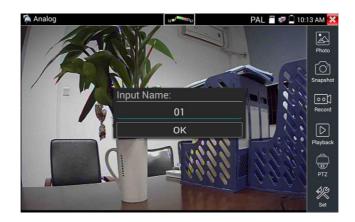

If not use touch screen to operate, press the key $(TELE^+)$ to zoom out , press the key wide- to zoom in, press upward and downward key to move the image.

For analog video input, as the resolution is 720*480, it is normal that the zoom in image is not clear. But for network digital video input, as it supports resolution up to 1280*960, the zoom in image is still very clear. This is very helpful for IP camera installation.

(4) Snapshot

Click the icon "Snapshot", when the video in, to take a picture and save the current video frame in the SD card as JPEG file.

If the unit is set to the manual mode an "Input Name" pop up box will appear and you can enter a title for the snapshot. If the unit is set up to automatically set file names, this box will not pop up.

(5) Video record

When you click the "Record" icon, video starts recording. A red recording icon appears on the screen and begins to flash and a timer appears indicating the time elapsed for the video. Click on the "Record" icon again to stop recording and save the video file to the SD card.

If select manual storage, before recording begins ,appears dialog box "Input Name", user-defined the

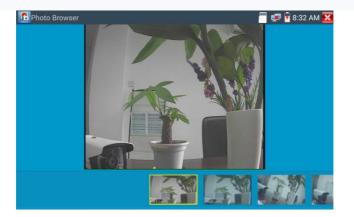

files name(by Chinese character, English letter or digit) to store in SD card, tester will hereby store the files in SD card after recording. if select "Auto-storage", tester will auto store the files in SD card after recording.

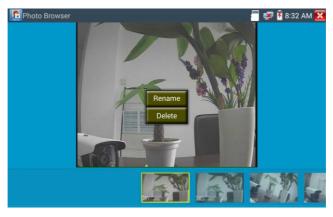

(6)Photo

Click the icon "photo" to enter, click the selected thumbnail photo to display it on the screen.

Double-tap the image you want to view to make it full screen. Double-click again the photo to return.

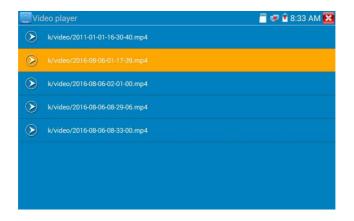

To rename or delete an image, click and hold on the file until this screen below appears

Click to close and return to PTZ controller.

(7) Recorded video playback

Click the "Playback" icon to view your recorded videos. Tap on the video file image you want to watch.

To rename or delete a video, click and hold on the file until this screen appears:

Vic	leo player		🖑 🐖 🖥 8:33 AM 🔀

Video files also can play in the main menu "Video Player".

3.3.12 Color-bar generator (TV OUT)

Click **The end of the end of the**

🛄 ΤΥ ΟυΤ		🖹 🕏 📋 8:55 AM 🔀
Output format:	Input format:	No video signal

Click the selected color-bars, testing image or single bar (red, green, blue, white or black). Double click to full display on the screen and output, click to return main menu. Application

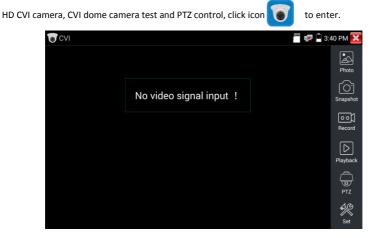

BNC loop test: Tester can send and receive color bar generator through the tester's "video out and video in" port, it is for testing transmission channels, such as video Optical, video cables etc. The tester "VIDEO OUT" port to connect optical terminal's sending port, and "VIDEO IN" Port to optical terminal's connect its receiving port.

A. When maintaining the dome camera, the tester sends out the color bar by its BNC output to the monitor at the monitoring center. If the monitor receives the color bar, it means the video transmit channel works normally. Meanwhile on the basis of the received color bar, the monitoring center can judge if transmission has loss or interference.

- B. The tester sends out the pure color bar (such as white and black color), to test the monitor whether has bright or black dots.
- C. The tester sends out video signal image to test if the image received by the monitor has excursion.

3.3.13 CVI camera test

When HD CVI signal input, the tester will display the image resolution on the top bar. Double-taps on the screen to make the image displayed full screen.

The tester supports resolution as follows

1280x720P 25FPS / 1280x720P 30FPS / 1280x720P 50FPS / 1280x720P 60FPS

1920x1080P 25FPS / 1920x1080P 30FPS/2560x1440P 25FPS/2560x1440P 30FPS.

(1) PTZ control

1.1 Coaxial PTZ control

Click the icon "PTZ" on the right toolbar to do the corresponding setting.

"Port": select coaxial control

				8	8:41 AM 🔀
UTC					
RS485/RS232					
	Coaxitron: Address 2:0 Si UTC RS485/RS232	Coastron:	Coasitron: MENU Address 20 SignSJ in put 1 UTC RS485/RS232	Coavitron: Coavitro: Coavitro: Coavitro: Coavitro: Coavitro: Coavitro: Coavit	Port : UTC Coasitron: MENU Address : O Sign S hput !

Enter PTZ address to perform parameters setting.

Operation instructions, please refer to "3.3.1 PTZ (1) Video monitor test".

The PTZ address in the tester must be consistent with the dome camera or decoder, then the IPC tester can test .After setting the parameter, the tester can control the PTZ and lens.

To control PTZ by screen touch:

Tap left, right, upward and downward on the touch screen to control the PTZ rotation direction, PTZ cameras will rotate accordingly. By two fingers move outward and inward on the touch screen to zoom in and out the PTZ.

To control PTZ by key buttons control the PTZ direction of rotation Press the key < \bigtriangleup \triangleleft Press the key (OPEN or CLOSE , to switch on or turn off the aperture Press the key (FAR+ or NEAR-, adjust the focus manually Press the key (TELE+ WIDE-, manually adjust the zoom or

Set preset position

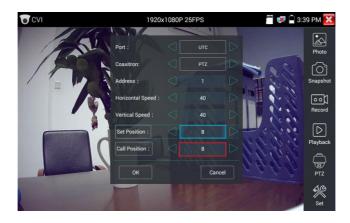

Setup preset position: Move the PTZ camera to the preset position, then Tap it and input preset position number. Tap "Set position" to complete set preset position.

Call preset position

Tap the preset position:

Tap the preset position area, input preset position number. Tap "call position" to complete call preset position.

Operation instructions, please refer to "3.3.1 PTZ (1) PTZ control parameters setting".

(2) Coaxial camera menu setting

Tap icon "UTC", select "menu setting" to enter the dome camera menu.

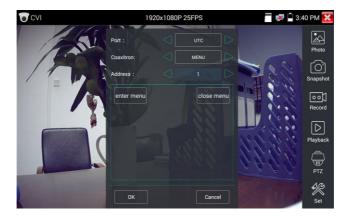

Input calling dome camera menu address code, after finishing the parameter settings, you can press

Press arrow keys
$$\bigtriangleup$$
 \bigtriangledown \bigtriangledown \bigtriangledown \circlearrowright to set

(3) Snapshot, record, photo viewer and video play back, please refer to "3.3.1 PTZ (1) Video monitor test".

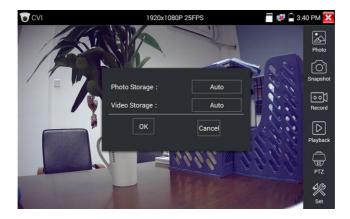

Tap "close menu" or press the key " (ENTER)" to close camera menu.

(4) Save setting

Click icon "Set" on the right toolbar to enter storage setting.

Support auto-storage and manual storage.

When select manual storage, user can name and store the files.

3.3.14 TVI camera test

HD TVI camera, TVI dome camera test and PTZ control, click icon
to enter.

t

When HD TVI signal input, the tester will display the image resolution on the top bar. Double-taps on the screen to make the image displayed full screen.

Set

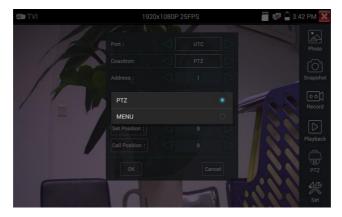

The tester supports resolution as follows:

1280x720P 25FPS / 1280x720P30FPS / 1280x720P 50FPS / 1280x720P 60FPS 1920x1080P 25FPS / 1920x1080P 30FPS / 1920x1080P 50FPS / 1920x1080P 60FPS /2048x1536P 18FPS/2048x1536P 25FPS/2048x1536P 30FPS /2560x1440P 15 FPS/2560x1440P 25 FPS/2560x1440P 30 FPS/2688x1520P 15FPS/2592x1944P 12.5FPS/2592x1944P 20FPS

Coaxial camera menu settings

Tap icon "UTC", select "menu setting" to enter the dome camera menu.

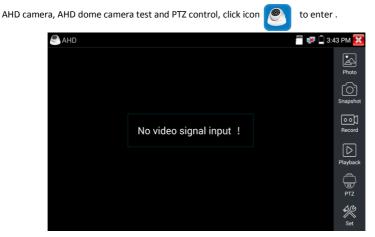

Input calling dome camera menu address code, after finishing the parameter settings, you can press the key (ENTER) or click the icon (to call the dome camera menu.

More operation instructions (such as PTZ control, coaxial camera menu setting, snapshot, recording and playback etc), please refer to "3.3.6 CVI camera test".

3.3.15 AHD camera test

When AHD signal input, the tester will display the image resolution on the top bar. Double-taps on the screen to make the image displayed full screen.

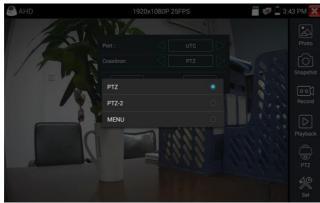

The tester supports resolution as follows:

1280x720P 25FPS / 1280x720P 30FPS / 1920x1080P 25FPS / 1920x1080P 30FPS/2048x1536P 18FPS/2048x1536P 25FPS/2048x1536P 30FPS /2560x1440P 15 FPS/2560x1440P 25 FPS/ 2560x1440P 30 FPS/2592x1944P 12.5FPS/2592x1944P 20FPS

(1) Coaxial PTZ control

UTC control: select "PTZ control or PTZ control-2".(AHD camera has two different order ,if select "PTZ" cannot control , please go "PTZ-2")

If to coaxial PTZ control the AHD camera, no parameters setting is needed.

More operation instructions please refer to "3.3.6 CVI camera test".

3.3.16 Network tool

(1) IP address scan

Connect the cable to the LAN port, click icon Connect the cable to the LAN port, click icon changing the Start and End IP addresses. Click the "Start" button to scan the IP address range. You can also input an IP address in the Port Number Scan to scan for open ports.

(2) PING Test

Connect a network cable to the LAN port and click the icon to open the PING tool. You can set your LOCAL (native) IP address, Remote IP address (e.g. IP camera), Packet count, Packet Size, Packet time and Timeout. Press "Start" to start pinging. If the IP camera or network device is not configured properly or not plugged in, it will say "Destination host unreachable" or have 100% packet loss. If the tester connects to the device, the send and receive packets will have a 0% packet loss.

💷 network to	ol		🚪 💷 📋 8:57 AM 🔀
IPROADE SCAN	Native IP :	192.168.0.253	PING 192.168.0.201 (192.168.0.201) 56(84) bytes of data.

Network bandwidth testing can also be tested with a computer using compatible network bandwidth testing software. Install network bandwidth testing software on a computer, as a test Client or Server, to do the mutual testing with the tester. If use computer as the server, the computer IP address is:192.168.0.39.

Network	Tester	
	• English	
	((Server)	
	C (Client)	
	Start Test	

Tester as Client, tester's IP address is:192.168.0.238. The Server and the Client are at the same network segment, but with different IP address. Input Server's IP address 192.168.0.39 in the tester and click "Start" to test network bandwidth.

IP	Service IP: 192.168.0.238		192.168.0.39

(4) Port Flashing

Connect a network cable to the meter's "LAN port", click the icon it to open the Port Flashing app. Click "Start". The IP tester sends a unique signal to make the connected LAN port of the switch flash.

If the tester and PoE switch are connected well, the LAN port of POE switch flash at special frequency, If not, no any changes on the LAN port.

Application:

The tester will send special signals to make the connected LAN port flicker at special frequency, which will enable the installers to easily and quickly find the connected Ethernet cable. This function can prevent mistakenly insertion or disconnection non-corresponding cable to artificially interrupt network connection.

(5) DHCP server

Click on the DHCP icon to open the DHCP server app. Select the "Start" check box at the top and make any desired changes to the network settings. Click "Save" to start assigning dynamic IP addresses for IP cameras and other networked devices. Click the "Refresh" button to check your Client list.

Trace Route			
Link Monitor	Stop	Add	Dele

Application:

Add an IP camera or other network device to the current network group, the new IP address must not be occupied, otherwise it will cause IP conflicts and stop the equipment normal working. Link monitor can check if the new setting IP address is occupied.

3.3.17 Rapid IP Discovery

to enter Rapid IP Discovery app.

Click "Start" to search all IP address of connected equipment in whole network segment.

Click "Stop" to stop work.

3.3.18 PoE power / DC12V 2A and DC 5V 2A USB power output

When the tester is turned on, the DC 12V and DC 5V power output functions are automatically turned on. If the IP tester is turned off, the DC 5V USB can still be used to power an external USB device. To use the PoE Power Output function, click on the icon and change the switch "ON" or "OFF". The IP camera needs to be connected to the LAN port before you turn PoE Power on. If the IP camera Supports PoE, the PoE power is delivered via pins 1, 2, 3, and 6 on the LAN port. The IP tester will display "48V ON" at the top of the screen when the POE power is still on.

- 1. Don't input power into the "DC12/2A OUTPUT" port.
- 2. Don't output this DC12V/2A power to the DC12V/IN port of the IP camera tester to avoid destroy.
- 3. The IPC tester power output is close to 2A, if the IP camera's power is over 2V, the tester will auto enter protection mode. Disconnect all the connections of the tester and then connect the tester with power adaptor to resume the tester.
- Before turning on the PoE power output, please make sure the IP camera supports PoE power.
 Otherwise it may damage the IP camera.
- 5 Make sure you plug in your IP camera to the LAN port prior to turning on PoE power.
- 6. Make sure the tester is full charged or more than 80% charged, otherwise the tester will shows "low power", "not able to supply power".

3.3.19 Cable Test

Cable Tester		🚆 😻 💆 9:26 AM
Remote kit : 255	Cable Type :	straight-through cable
Diagram of the	1 2 3 4 5 6 7 8	

Test LAN cable or telephone cable.

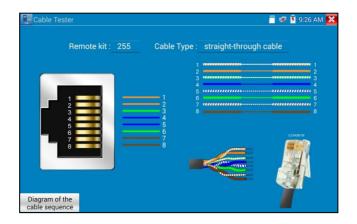

Connect LAN cable or telephone cable with the CCTV tester and cable tester. And then the connecting status, cable type and the sequence of wires as well as the serial number of the cable tester kit will be displayed.

The number of the cable tester is 255.

If need several different number other types cable testers, should pay the additional cost.

Cable test

Tap "cable test sketch map", pop up Straight-through cable and crossover cable sketch, It is for line sequence reference, when the crystal on the first pressure in the twisted-pair.

Click "Help", check the instruction of all parameters.

3.3.21 PoE Voltage test

Click icon **Poz** to enter PoE voltage measurement.

			0	o t
	LAN	PSE / PoE IN		
	¹ / ₂ 47.7 V	.47,7 V 0.0 V		Ы
voltage	₹ 47.7 V	47.7 V	11.8V	12.2V
	⁷ 8 0.0 V	0.0 V		

Connect a network cable from a PoE switch to the IP tester's PSE IN port. Connect an IP camera or other PoE using node to IP tester's LAN port, the PoE voltage and the cable's pin connection status show on the screen.

Note: This test if for measuring the voltage being drawn by the PoE node and the IP tester must be between the PoE switch and the PoE node for this test to work.

Note: The PoE switch must be connected to the PSE IN port. The powered device such as IP camera or other PoE node must be connected to the LAN port.

Note: Do not connect PoE power supply equipment (such as a PoE switch) to the tester's UTP/SCAN port, otherwise it will damage the tester.

PSE transmission

When PoE / PSE voltage testing, PoE/PSE conntect to the tester's PSE "IN" port, the camera connetct to tester's Lan port, tester not only can transmit voltage to supply power for camera, but also transmit data at the same time, as well as the computer connect to the PoE/PSE, it can log in connected tester's PoE camera.

3.3.22 12V power input test

Connect 12V power adaptor to tester's charging port, then click icon "PoE" to enter voltage measurement app, screen show the current adaptor input voltage and power. Note: the current 12V input measured power is the battery charging power and the device working power; the measured power will change depending on the different of battery power and backlight brightness.

Warning: Not allow connect device with input power over 17V to tester "12V IN" port, otherwise it will damage the machine.

3.3.23 Audio Record

Connect an audio device to the IP tester's audio input port. Click the even icon to enter the Audio

Recorder app. Click the red button to stop, and the unit will prompt you to save the recording.

3.3.24 Data monitor

Click "Setting" to choose the baud rate of RS485, it must be the same as the DVR or the Control. Keyboard. The DVR or Control keyboard send the code to the tester, if it can be read, the protocol will shown on the upper right, like Pelco D, if not, like P:---

While the tester receives the code, press the

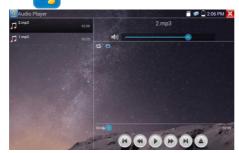

Though the RS485 port, display the PTZ control code of the multifunctional keyboard or the DVR. Controller can check the status of the RS485 transmission through the code on the display. (The RS485 communication rate must be the same.)

Application: Check the RS485 communication states of the video optical transmitter whether normal. Engineer can analyze the protocol and check the data through the displayed code.

3.3.25 Audio player

Click the icon

to enter. The audio player only supports MP3 format Audio files.

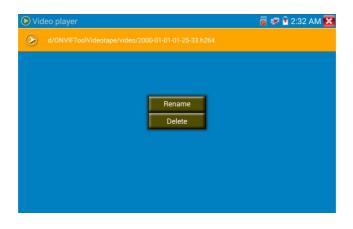

3.3.26 Media Player

The Media player can browse video and image files. It supports the video formats of MP4, H.264, MPEG4 and MKV. The IP tester recorded files can play directly via the Media player. The Media player will automatically display the video files from the SD card. Click on the desired file to play. Click RETURN to exit.

To rename or delete an existing file, press the file name for a few seconds until the screen below appears. You can then rename or delete the file by pressing the desired option.

3.3.27 RTSP Player

The RTSP Player app will allow you to view the RTSP video stream from an IP camera. If you were unable to view your camera via the ONVIF or IPC Test apps, it is possible your camera will have an RTSP stream and you can view live video.

From the main menu, select the "APP Tool" folder and then select the "RTSP Player" to open the app. If the IP camera uses MJPEG, select the RTSP icon. If the IP camera uses H.264, select the "RTSP HD" icon.

Version information: Shows applications version information, if press any apps icon several seconds to

uninstall.

Screen display rotation: Click on "Screen Rotation" to flip the IP tester's display 180 degrees. This function is very convenient for the user to connect the LAN cable on the bottom of the unit without having to flip the unit itself.

PTZ address scan: You can toggle the PTZ Address scan off or on before entering the "PTZ controller" app. This needs to be turned on in order to use the PTZ Scan feature of the PTZ app.

User Feedback: If you have any comments or suggestions for the tester, please connect it to network and write your feedback.

Lock Screen: The meter default is not locked. You can choose password Lock screen, pattern Lock screen or "NO".

Password Lock Screen: Set password, you can input digitals, letters or characters as password, input it again to confirm .when the meter is in standby mode or turn it on, you can input your password to enter.

Pattern Lock Screen: Drawing a pattern to lock. While the meter is in standby mode or turn it on, you can input your pattern to enter.

Modify Lock screen password, you need input lock password again. Select password Lock screen or pattern Lock screen to reset lock screen password. After reset pattern lock screen, you need to draw a new lock pattern.

Restore the factory settings: If the tester to restore factory settings, all your personal files and apps will be removed.

3.3.35 File explorer

Click "File" on the top bar tool, can select internal or external storage. Click on the upper right corner

Icon "... ".will pop-up menu, you can select other operation or exit.

	start service	

3.3.36 Theme

Click Theme icon to enter themes setting.

Desktop style : You can select Lite mode or normal mode.

Theme:

Pressing square area's any color icon several seconds, the selected color icon will be auto move the

rectangle area, if you press selected color several seconds, and it will be auto deleted.

Theme colors include fixed order and random order, and click "set" to save.

When set background color, you can select colors from Color Phase, and also can input color's RGB to

set.

Color

After finished color setting, click "set" to set it as desktop or application background.

Theme		i ø	📋 8:52 AM 🔀
Desktop style			
Theme	Set as desktop background	A : 255	
background	Set application background	R : 50	
Sliding effect	Simultaneously	G : 50 B : 100	
	Cancel		

Set as desktop background: Setting color as desktop background.

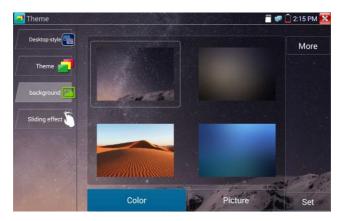

Set as application background: Set color as application background.

Set at the same time: Setting color as desktop background and application background.

Cancel: Cancel current setting.

Picture:

Click Picture to select one, and set as temporarily background to view setting effect. Click "more" to select pictures from local file, and click set to set picture as background.

Sliding effect:

Tester's sliding effect includes stereo effect, folding effect, Left and right folding, rotate effect, Gradual effect etc, selecting one of effect to view slide effect in the square area, and click "set" to save.

3. 4 Audio test

You can test the audio input from audio pickup devices by connecting the audio pickup device to the IP tester with the supplied audio cable.

3.5 HDMI output

The built in HDMI output port can output live video from an analog or IP camera, recorded files, media files and images to HDTV monitors. Connect an HDMI cable from the IP tester to an HDTV monitor at any time. It supports up to 1080P resolution.

3.6 PoE power output

The IP tester supports PoE (Power over Ethernet) output to an IP camera via the LAN port. Data transmission and 48VDC use the network cable's 1, 2, 3, and 6 pins to deliver power. If the IP camera supports PoE, you can directly connect to the camera without the use of an external power supply.

a. Please make sure the cable connected to the tester's Lan port is straight-line cable and has no short circuit, otherwise will damage the tester.

b. Before using POE power output, please check the IP camera whether supports POE powered, otherwise it will damage the IP camera.

c. The instrument's PoE maximum power output is 24W. If Ultra- high-power load happens, the tester will enter protection mode .

3.7 DC12V 2A power output

When the IPC tester is turned on, the DC 12V power output ON by default. The smaller end of the supplied converter cable connects to the tester's DC12V/2A OUTPUT and the other end connects to the camera's power input.

Application

Power output function is mainly used in the camera field demonstration and testing, meanwhile, for some cameras installation sites, If there is no power outlet for the adapter to power the camera, the tester can offer temporary power for it. But we do not suggest tester supply power for a long time.

- a. Don't input any power into the "DC12/2A OUTPUT" port of the tester.
- b. Man-made damage is not within our company's warranty.
- c. The IP tester's power output capacity is 2A. If the IP camera uses more than 2A, the tester will automatically enter a protection mode.
- Disconnect all cables from the tester and reboot it to resume using the tester.
 The IPC tester power output is close to 2A, if the IP camera's power is over 2V, the tester will auto enter protection mode. Disconnect all the connections of the tester and then connect the

tester with power adaptor to resume the tester.

e. Make sure the tester has a sufficient charge, otherwise tester can't provide enough output power.

3.8 USB 5V 2A power output

When the tester is turned on, the DC 12V and DC 5V power output functions are automatically turned on. If the IP tester is turned off, the DC 5V USB can still be used to power an external USB device.

NOTE: The USB port is for power only and not data.

4. Specifications
