4-inch PTZ Camera   Quick Start Guide

Safety Requirements

Installation Requirements
- Comply with all local electrical safety codes and standards when operating the product.
- Check if the power supply is correct before operating the product.
  - Follow the electrical requirements to power the product. Requirements for selecting a power adapter:
    - The power supply must conform to the IEC 60950-1 and IEC 62368-1 standards.
    - The voltage must meet SELV (Safety Extra Low Voltage) requirements and not exceed ES-1 standards.
    - The power supply must meet LPS requirements and not exceed PS2.
  - We recommend using the power adapter provided with the product.
  - The power supply requirements (such as rated voltage) are subject to the product label.
- Do not connect the product to more than two power supplies unless otherwise specified.
- The product must be installed in a location only professionals can access to avoid the risk of non-professionals becoming injured from accessing the area while the product is in operation. Professionals must have full knowledge of the safeguards and risks when using the product.

Operation Requirements
- Do not open the cover when the product is powered on.
- Do not touch the heat dissipation component of the product.
